

1. Impact Potential (/25 pts)

Is this a real problem? Who does it affect and why does it matter?

Score	What it looks like
21–25	Clear, meaningful problem with defined users. Strong solution fit.
13–20	Real problem but vague users or weaker solution alignment.
6–12	Loosely defined problem or unclear usefulness.
0–5	Problem unclear or solution irrelevant.

2. Technical Execution (/30 pts)

Does the core functionality work?

Score	What it looks like
25–30	Fully working, strong AI use, real-world viability.
16–24	Mostly works, some gaps but clear concept.
6–15	Significant gaps, unclear demo, weak AI usage.
0–5	Does not work or mockup only.

3. Ethical Alignment (/25 pts)

Did the team consider risks and user impact?

Score	What it looks like
21–25	Deep ethical thinking, clear safeguards, user empowerment.
13–20	Some awareness, reasonable answers, minor gaps.
6–12	Surface-level ethics, unclear harms.
0–5	No ethical consideration.

4. Presentation (/20 pts)

Can the team clearly explain their work?

Score	What it looks like
17–20	Clear, confident, strong demo and next steps.
11–16	Covers basics, somewhat rough delivery.
5–10	Hard to follow, incomplete demo.
0–4	Incoherent or missing explanation.
